UNDENIABLY THE WORLD'S LEADING SOURCE
FOR DECORATIVE STONE

CAN•TE•RA: A SPANISH WORD MEANING "QUARRY"

Cantera stone is a strong, malleable natural stone formed by volcanic dust and ash washed into ancient silt beds and combined with lava and local stone where it is compressed and over millions of years turns into Cantera stone.

One of the most strikingly beautiful and enduring natural stones in the world, Cantera stone is endowed with unique thermal properties that allow it to absorb air and humidity without expanding or contracting. This fact plus its versatility and durability makes Cantera stone ideal for a multitude of interior and exterior architectural designs and decorative art. Available in a wide range of soft, yet awe-inspiring colors, this unique stone blends beautifully with any environment or landscape.

Time and nature have done their part to create this incredible stone. And now the artisans of Cantera Stone Art step in...molding, carving and shaping nature's gift into exquisite architectural and decorative elements for your home and business.

We are proud to present this portfolio of our creations to you and we look forward to enriching your environment with the timeless, elegant beauty of Cantera Stone.

Frank Samuys
Owner, Cantera Stone Art

Paulina Prieto
Owner, Cantera Stone Art

TIMELESS BEAUTY. PRECISION CRAFTSMANSHIP.

For three generations, Prieto family artisans have designed and crafted custom architectural masonry and decorative art from Cantera Stone. Our family's Cantera Stone Art is a division of Canterarte in southern Mexico, where we operate 15 quarries and a modern manufacturing facility. In addition, we invite you to visit our galleries and showrooms where our expert designers will help you create your stunning Cantera Stone piece.

Please visit our website, www.CanteraStoneArt.com for a complete list of our locations.

UNPARALLELED CRAFTSMANSHIP

Choosing the perfect piece of stone distinguishes our company from all others. Much like a sculptor chooses just the right stone for each individual carving, we hand select the right stone piece for each commissioned project. No two pieces are alike. And each piece is personally inspected right after it's cut.

CREATIVE DESIGN EXPERTISE

As a value-added service to our customers, we will use our generations of knowledge and experience to help you design your original piece. Our designs are traditional or contemporary, according to your preference.

IMPECCABLE SERVICE

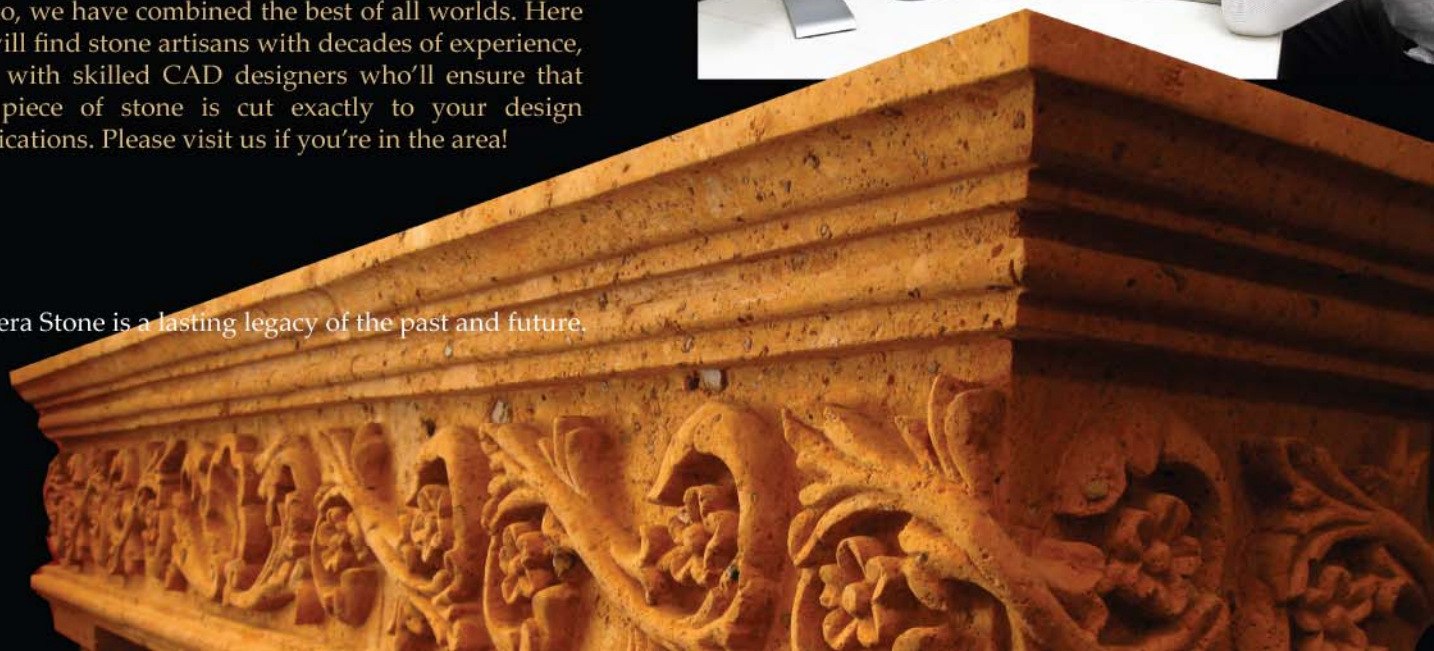

Cantera Stone Art is continuing the family tradition of excellence that was established more than 60 years ago. We remain attentive to every customer's needs. We listen. Ask questions. Help with color and grade selections. And maintain competitive prices. Our goal is to ensure your complete satisfaction, start to finish.

OLD WORLD MEETS CUTTING EDGE TECHNOLOGY

At our modern manufacturing facility in Hidalgo, Mexico, we have combined the best of all worlds. Here you will find stone artisans with decades of experience, along with skilled CAD designers who'll ensure that your piece of stone is cut exactly to your design specifications. Please visit us if you're in the area!

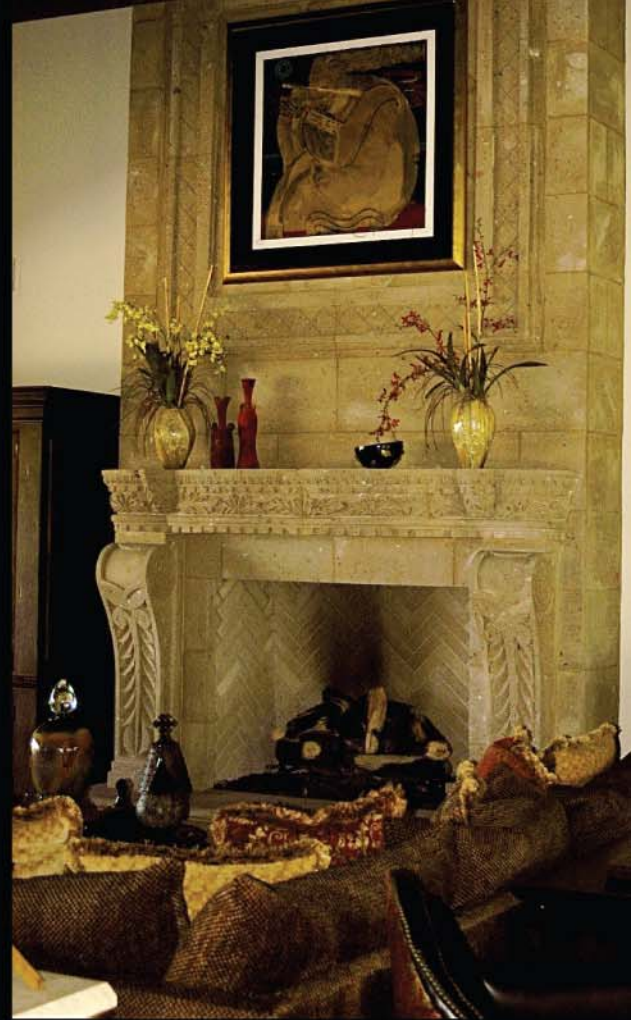

Cantera Stone is a lasting legacy of the past and future.
